Security and Compliance – The Perfect Storm

Overview

A perfect storm has formed in information security and compliance. The new global compliance requirements that organizations are facing require significant investments in business process engineering, technology, audit, knowledge management, and personnel. This session will discuss the current and emerging landscape of global and U.S. specific compliance requirements that organizations are currently or will soon face and the solutions and technologies that are available to address them. Discussions will include observations of key vendors and their capabilities, trends in both commercial and government sectors, outlook of emerging regulations and standards and their impacts, and insights into emerging solutions and technologies which will be utilized to address them.

Syllabus
